WHAT: NCCSIF is sponsoring a 1/2-day seminar on sanitary sewer overflow and backup risk management issues:

- Current Civil and Regulatory Liability Surrounding Sanitary Sewer Overflows
- Sanitary Sewer Overflow and Backup Prevention Strategies
- What Every Sanitary Sewer Overflow and Backup Response Plan Should Include
- The Role of the First Responder In Managing Liability
- The State Water Resources Control Board's 2010 enforcement plan
- **AND** what the State Water Resources Control Board inspectors will be auditing when they visit you

- WHY:**
- The average cost of a sewer backup claim in California in 2009 is ~\$27,000, up from ~\$4,500 in 1990
 - The State Water Resources Board will begin auditing your Sanitary Sewer Management Plan (SSMP) in 2010
 - What Field Crews do and say when responding to sewer backups can have a direct impact on the ultimate cost of any resulting claim
 - The number of Clean Water Act suits brought against public agencies for sewer overflows by groups such Baykeeper and River Watch show no sign of slowing down.
 - Add sizeable regulatory fines to this liability headache, and the message is clear:

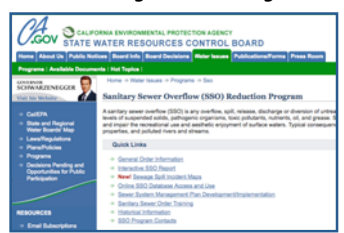

Be Prepared To Effectively and Efficiently Manage the Regulatory and Civil Liability Surrounding Sewer Overflows and Backups!

SPEAKERS: David Patzer, CSRMA Risk Control and Jim Fischer, Office of Enforcement/Special Investigations

WHO SHOULD ATTEND: Risk Managers, Public Works Directors, Supervisors and City Attorneys

WHEN: March 11, 2010 8am to 1200pm

WHERE: Yuba City Wastewater Treatment Facility
302 Burns Drive, Yuba City, CA 95991
Front Desk (530) 822-4639

REGISTRATION: Register by going to <http://www.sipeonlinetraining.com/csma/ViewSeminars.cfm> or by contacting Amber Anderson at AAnderson@alliantinsurance.com or 415.403.1482

This Seminar Will Help Your City to:

- Respond effectively to residential sewer backup incidents,
- Minimize the cost of any resulting claim, and
- Ensure compliance with the SWRCB and SFRWQCB reporting requirements
