Risk Control Online Has a New Look!

Be sure to check out Risk Control Online and its new design. You will still find all of the tools you have come to depend on, but we've updated our look.

And don't miss our new online training modules including emergency eye wash and showers, compressed air safety, pneumatic air tool safety, fire safety for schools, sodium hydroxide safety, antimicrobial pesticides, and five modules on general personal health.

Remember that most of the online training courses have been approved by the CWEA for contact hour credit for CWEA professional certification requirements. Certificates of Completion for courses approved by the CWEA will show the contact hour credit and CWEA approval code at the bottom.

Risk Control Online
Professionally engineered risk control solutions...
soundly conceived and practically executed.

Easy Training Management

Don't miss one of Risk Control Online's most valuable tools... the Employee Training Management System. This application is your key to efficient and accurate management of in-person and online training.

Use the online form to enter both online and in-person training requirements for each job title. For each required topic, select the initial due date and the recertification requirements. Employees can log in to access their training record, see what training modules they need to take, and print their certificates of completion.

You can also easily manage in-person training sessions. Include information about the instructor, topic, credit hours, dates and other relevant information on the online entry form. Then, after the training, simply check a box next to each employee who has completed the course.

This streamlined system allows you to track employee training efficiently and accurately. The Employee Training Management System... available now on CSRMA's Risk Control Online.

If you ever have any questions or want more information,
contact David Patzer, CSRMA Risk Control Advisor at (707) 373-9709 or losscontrol@sbcglobal.net.
